HTML5, CSS3, Ruby, Rails, Sinatra, OOP, SQL, Javascript, React, Redux, Node

TECHNICAL PROJECTS

D3PlayrCompanion - Github | Demo
An app for players of Diablo 3 to help keep track of characters that the user has built in-game with a digital card. Eliminates manual means of tracking character and game changes.
- Implemented Bcrypt Gem and User Sessions to store encrypted user information.
- Employed Ruby on Rails as an API to handle backend information.
- Used React/Redux to present information to a user.
- Incorporated Redux-Thunk and Rack-CORS to bring together backend and frontend.

MeetrReadr - Github | Demo
App for readers based on GoodReads to discover books and other avid readers to help foster conversations and ideas.
- Utilized Github OAuth as an alternative login option.
- Exercised Ruby on Rails for both backend and frontend.
- Applied MVC pattern to handle logic and UI.
- Employed paperclip gem so users can upload images of books.

Strain Domain - Github | Demo
App for medical marijuana patients to track and journal what works and what doesn't work for their specific diagnosis.
- Employed Ruby on Rails as an API to handle backend information.
- Used Object Oriented Vanilla JavaScript for client-side presentation and DOM manipulation.
- Utilized SQLite relational DB to persist and maintain data.
- Incorporated beta-testers to track bugs and gage user experience.
